ABOUT US

Sourcing internationally can be a challenging process, especially when the country you're sourcing from speaks a different language. The potential risks involved in international sourcing may seem overwhelming, but Revive Wood Products is here to help minimize those risks.

We are an Indonesian based company with a blend of Indonesian and American leadership. The need for our business model emerged from the increasing demand from North American companies for China + One sourcing strategies. Southeast Asia, particularly Indonesia and Vietnam, have become the beneficiaries of this trend for direct sourcing of finished building products and components, and Revive Wood Products is here to facilitate these vital supplier relationships on behalf of door importers and distributors.

Working with a foreign supplier involves more than just buying and selling. You'll need to thoroughly vet the company, manage logistics, negotiate payment terms, clearly communicate product specifications, form or hire a quality control team, appoint a factory supervisor, and effectively manage any day-to-day issues that arise with the order. Doing all of this from another continent and time zone only adds to the complexity. Let Revive Wood Products help you navigate these challenges and successfully source your products internationally.

Our Indonesian partner mill is a world-class stile and rail wooden door factory that delivers large volumes of high-quality wooden primed, pre-finished, and veneered doors and accessories. These products, including stile and rail flush, panel, and glazed interior and entry doors, are sold in the UK and North American markets at competitive prices. Choose Revive as your trusted Asian sourcing solution for doors, jambs, gesso primed mouldings, and more.

We value trust as an important factor in building partnerships with clients. We carefully select and evaluate companies before offering them as potential partners, with the aim of establishing a trustworthy portfolio of manufacturers. Revive Wood Products also emphasizes transparency in all our dealings with companies to ensure a strong, reliable partnership.

Revive Wood Products streamlines business expansion in Southeast Asia with comprehensive services for setting up an office in Indonesia, Vietnam, Cambodia, Thailand, or Malaysia. Our team, with over 20 years of experience in the region, is proficient in navigating local languages, cultures, and business practices. We specialize in the woodworking sector and offer a tailored approach, matching clients with the best factories for their needs.

"Our focus has always been on building long-term partnerships, ensuring quality, and delivering reliability."
