REVIVE WOOD PRODUCTS

ABOUT US

PT Rimba Karya Sejahtera, aka Revive Wood Products, is a corporation established in Indonesia in 2019 by the Indonesian - American family the Sheffer's. We offer competitive and comprehensive services to overseas clients in the building products and wood home décor segments. Specializing in mouldings and millwork products we have deep knowledge about doors and decorative mouldings especially, and offer clients support in; Sourcing, New Supplier Acquisition, New Product Development and Testing, In-Process and Pre-Shipment inspections, Compliance and Social Audits and in Factory Quality and order Management.

With over 20 years of combined experience, Revive has developed and is working with very prominent wood mills in Indonesia & Vietnam. Our emphasis is in moulding & millwork. In Indonesia we work with a high quality world-class door mill producing wooden primed, pre-finished and veneered doors and door accessories. Offering high quality low cost stile and rail flush, panel or glazed interior and entry doors, the mill customarily sells into the UK, and North American markets. Let Revive Wood Products become your Asian Sourcing Solution for doors, jambs, gesso mouldings and more.

Sourcing internationally can be a daunting task for some; especially sourcing in countries that don't speak the same language as you do, the risk involved with sourcing abroad may seem immense but Revive Wood Products is here to minimize such risks. Working with a supplier abroad is much more than just buy and sell, you will need to vet the company, manage logistics, negotiate payment terms, explain product specifications, form/hire a quality control team, appoint a factory supervisor, audit and so on. We at Revive Help streamline the process by providing all of the services you will get as if you were opening your own office in Asia.

Revive Wood Products realizes that the key to a strong partnership is trust, therefore we push for transparency with every company we work with. We source and vet companies well before you have contacted us, with the goal of developing and building a portfolio of manufacturers for future clients.
